

What is claimed is:

1. A holster for receiving and retaining a pricing or labeling gun, the holster comprising:
  - a unitary body having a front panel, a rear panel and a pair of opposed side panels, said panels defining a cavity having a generally rectangular cross section for receiving a pricing or labeling gun; and
    - an attachment means at the upper end of the rear panel.
2. A holster according to claim 1 wherein the holster is manufactured from rigid or semi-rigid plastic.
3. A holster according to claim 2 wherein the plastic is selected from the group consisting of polypropylene, polystyrene, acrylonitrile-butadiene-styrene (ABS), polyvinylchloride, polyvinylfluoride, acrylic copolymers, polyvinyl butyrate, polycarbonate, polymethacrylate, polyesters, ionomeric ethylene/methacrylic acid copolymers, polyurethanes, and ethylene propylene diene monomer (EPDM).

4. A holster according to claim 1 wherein the front panel is provided with a pair of flutes which define an upwardly opening notch.
5. A holster according to claim 1 wherein said side panels have a generally concave upper surface edge.
6. A holster according to claim 1 wherein said attachment means comprises a clip integral with the upper portion of the rear panel.
7. A holster according to claim 6 wherein said clip has a lower end spaced from said rear panel.
8. A holster according to claim 1 wherein said panels forming said holster have a thickness of from 0.05 inches to 0.10 inches.

9. A holster according to claim 1 wherein said panels forming said holster have a thickness of from 0.08 inches to 0.13 inches.

10. A holster according to claim 1 wherein said panels form a substantially rectangular cross-section.
